ONLINE PASTRY HOUSE

INTRODUCTION

Overview:

An online cake shop that allows users to check for various products available at the online store and purchase online. The project consists of list of products displayed in various categories. The user may browse through these items as per categories. If the user likes a product he may add it to his shopping cart. Once user wishes to checkout he must register on the site first. Now he may pay through cash on delivery. Here we use user friendly interface to make the entire frontend. Thus, the online cake shopping project brings an entire bakery shop online and makes it easy for both buyer and seller.

purpose:

The purpose of the **"Cake Ordering System "** is to have a system that handles the day-to-day sales operations in a cake shop and measures them very thoroughly. Users can waste less time as compared to manual paperwork on an automatic device.
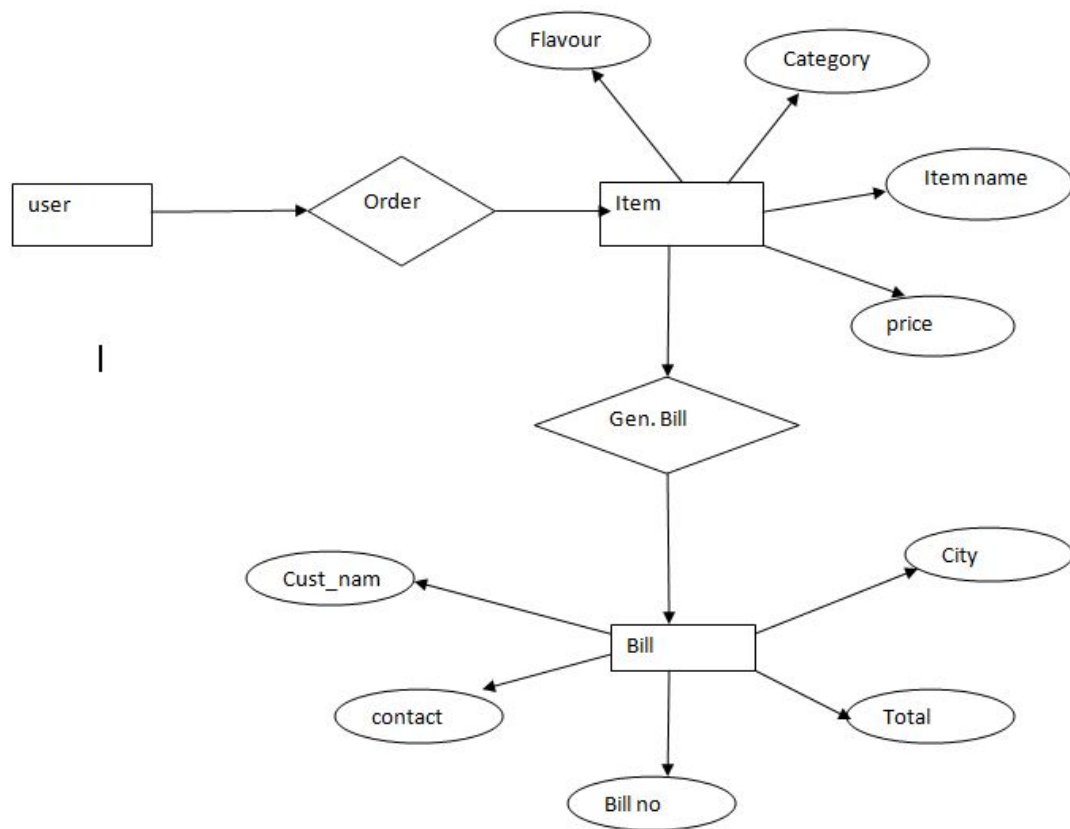

LITERATURE SURVEY

Existing Problem:

You can't get the cake without stepping out of your home, it waste your efforts and waste your time as well. You can't also plan a cake delivery at your friend's place too. if you go to a retail shop and try to order from there, you will get only a limited number of cakes and designs.

Proposed Solution:

Getting the cake delivery at the doorstep is one another benefits ordering online cakes. You get the cake without stepping out of your home, it reduces your efforts and you can focus on other important works. Getting delivery at doorstep is the ultimate experience you have ever had. You can also plan a cake delivery at your friend's place too.No more long drives and finding a parking space just to order a cake, No more walking through crowded areas. With the existence of online delivery, you can purchase you cakes and can choose from a wide range of cakes available online.
